Whittaker–Henderson smoothing revisited: A modern statistical framework for practical use Guillaume Biessy	1
What KAN mortality say: smooth and interpretable mortality modeling using Kolmogorov–Arnold networks Lianzeng Zhang and Yuan Zhuang	32
Marked Cox models for IBNR claims count: continuous and discretized approaches with Dirichlet-driven reporting delays Hassan Abdelrahman, Andrei L. Badescu, Radu V. Craiu and X. Sheldon Lin	60
Stationary probabilities and the monotone likelihood ratio in bonus-malus systems Kolos Csaba Ágoston and Dávid Papp	89
Modeling discrete common-shock risks through matrix distributions Martin Bladt, Eric C. K. Cheung, Oscar Peralta and Jae-Kyung Woo	101
Collaborative and Parametric Insurance on the Ethereum Blockchain Pierre-Olivier Goffard and Stéphane Loisel	127
A nonzero-sum game with reinforcement learning under mean-variance framework Junyi Guo, Xia Han, Hao Wang and Kam C. Yuen	154
Quantifying Systemic Risk: Conditional Interval Risk Measures and Their Applications Limin Wen, Junxue Li and Yi Zhang	181
Risk aggregation and stochastic dominance for a class of heavy-tailed distributions Yuyu Chen and Seva Shneer	206
Optimal proportional insurance under claim habit Jingyi Cao, Dongchen Li, Virginia R. Young and Bin Zou	220
Asymmetric Nash insurance bargaining between risk-averse parties Tim J. Boonen and Yichun Chi	243
Worst-case distortion risk measures of transformed losses with uncertain distributions lying in Wasserstein balls Jun Cai, Fangda Liu and Mingren Yin	270
